I am a Javascript Developer that focuses on frontend frameworks such as React. I am passionate about Design Systems, Web Accessibility, and Serverless technologies such as Firebase in Agile and Kanban settings. To grow my skills, I focus on building a web application for a sustainable menstrual health social enterprise called Eco Options.

🧠 Skills

- Javascript
- ReactJS
- HTML5/CSS
- TailwindCSS
- Git | Github
- Firebase
- Jest

💼 Professional Experience

Frontend Web Developer, *Freelancer* ⧉   09/2022 – present
I combine my technical knowledge with my keen eye for design to develop accessible web applications that are scalable and efficient while providing engaging, pixel-perfect user experiences.   Remote

Volunteer Web Developer, *Eco Options* ⧉   01/2022 – present
Built and maintain a web-based e-commerce application focused on providing   Kampala, Uganda
sustainable menstrual products and educating Ugandan women about them. The tools used are React, Github and firebase. It has helped over 250 women access menstrual cups and had a social-economic impact of over $5,000.

Frontend Developer Intern, *Oluadepe Farms Nig. Limited*   05/2022 – 09/2022
My primary focus was improving the UI of the web and desktop application to enable fish   Kampala, Uganda
farmers and various stakeholders to have a great user experience. Using Javascript with a specific focus on React, I added UI pages and routes according to the available Figma designs and collaborated with the backend team to utilize RESTful APIs to create, read, update and delete information in the various applications.
